SUMMARY

Final-year Software Engineering undergraduate at SLTC Research University with hands-on experience in full-stack development, MLOps, and AI-powered applications, committed to building and deploying end-to-end solutions

EDUCATION

Bachelor of Science (Honours) in Software Engineering

Expected November 2026

Sri Lanka Technology Campus, Faculty of Computing

Relevant Coursework: Software Engineering, Web Technologies, Database Systems, Machine Learning, Cloud Computing, Data Structures & Algorithms

PROJECTS

Chat App – Full Stack Real-Time Chat Platform

2026 – Present

- Built a full-stack real-time chat platform with React, JavaScript, ASP.NET Core, SignalR & RabbitMQ, featuring DMs, group channels, voice/video calls, AI chat, and media sharing.
- Implemented JWT auth, Entity Framework Core, Docker containerization, and a Java-based media service for scalable file handling across a microservice architecture.

Hostel Management System – Full Stack Web Application

2026 – Present

- Built a full-stack hostel management system with PHP 8.0, MySQL, Bootstrap 5 & jQuery, featuring role-based admin/tenant dashboards, room booking, occupancy tracking, and maintenance management
- Implemented secure authentication, payment processing, and automated email notifications via PHPMailer, with a normalized MySQL schema optimized for rooms, tenants, and payments

Churn Prediction MLOps Pipeline – Machine Learning Project

2026

- Built an end-to-end MLOps pipeline with Python, scikit-learn, MLflow & Docker, automating data ingestion, feature engineering, model versioning, and FastAPI deployment.
- Tracked 30+ experiments across Random Forest, XGBoost & Linear Regression, achieving 87% accuracy with GridSearchCV, and built a React dashboard for real-time churn predictions.

Portfolio Website – Frontend Web Project

2026 – Present

- Built a responsive React.js portfolio with dynamic routing, lazy loading, and SEO best practices, improving Google Lighthouse score from 62 to 94

E-Commerce Website – Full Stack Web Project

2025

- Built a full-stack e-commerce platform with React, Node.js, Prisma & SQLite, featuring JWT auth, role-based admin dashboard, cart, orders, and Cloudinary integration.
- Developed a secure REST API with PayPal payments, advanced product filtering, and a responsive UI using Tailwind CSS and Redux Toolkit.

Jarvis – AI Voice Assistant – Personal AI Project

2025

- Developed a Python-based voice assistant using OpenAI GPT, SpeechRecognition, and pyttsx3, achieving sub-2-second responses with live news, weather, and Wikipedia integrations

SKILLS

Frontend: React.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap, Vite, Redux

Backend & Databases: Node.js, Express.js, REST APIs, Python, FastAPI, C#, ASP.NET Core, Java, MySQL, SQLite, Prisma ORM, MongoDB, Firebase

ML & DevOps: scikit-learn, MLflow, pandas, NumPy, Apache Airflow, DVC, Docker, GitHub Actions, Git
